

INDEX

S. No.	List of Practical	Page No.	Signature
1.	Write a program that implements the concept of Encapsulation.	1	
2.	Write a program to demonstrate concept of function overloading of Polymorphism.	2	
3.	Write a program to demonstrate concept of constructor overloading of Polymorphism.	3	
4.	Write a program to print the Prime Number series up to 50.	4	
5.	Write a program to print first 10 numbers of the following series using do while loop 0, 1, 1,2,3,5,8,13.	5	
6.	Write a program to check the given number is Armstrong or not.	6	
7.	Write a program to find the factorial of any given number.	7	
8.	Write a program to sort the element of one dimensional array in ascending order.	8	
9.	Write a program for matrix multiplication using input/output stream class.	9-10	
10.	Write a program for matrix addition using input/output stream class.	11	
11.	Write a program for matrix transposes using input/output stream class.	12	
12.	Write a program for Vector class which performs all the methods of that class.	13	
13.	Write a program to check that the given string is palindrome or not.	14	
14.	Write a program to arrange the string in alphabetical order.	15	
15.	Write a program for String class which performs all the methods of that class.	16	
16.	Write a program for StringBuffer class which performs the all methods of that class.	17	

17.	Write a program to calculate simple interest using the wrapper class.	18	
18.	Write a program to calculate area of various geometrical figures using the abstract class.	19	
19.	Write a program where single class implements more than one interface.	20	
20.	Write a program that uses multiple catch statements within the try-catch mechanism.	21	
21.	Write a program where user will create a self-Exception using “throw” keyword.	22	
22.	WAP for multithread using different methods of Thread class.	23	
23.	Write a program for multithreading using synchronized () method of Thread class.	24-25	
24.	Write a program for multithread for setting the priority of the thread and the print their priority.	26	
25.	Write a program to create a package using command and one package will import another package.	27	
26.	Write a program for reading and writing bytes to a file.	28	
27.	Write a program for demonstrate the switch statement, continue and break.	29	
28.	Write a program for creating a text file and perform write operation using FileWriter class.	30	
29.	Write a program for perform read operation using FileReader class.	31	
30.	Write a program for JDBC to display the records from the existing table.	32
